Uses thermal paper instead of ink

## Who It Is For

---

- ✓ Business travelers needing portable printing
- ✓ Remote workers with limited desk space
- ✓ Field professionals requiring quiet operation
- ✓ Event organizers needing on-site printing

## Who It Is Not For

---

- ✗ Home users needing color prints
- ✗ Photographers requiring high-resolution output
- ✗ Office staff needing large-volume printing

## Trade Offs to Consider

---

- Limited to monochrome printing only
- No duplex printing capability
- Requires thermal paper instead of ink
- Smaller print size options available

## Users Say

---

### ● POSITIVES

- ✓ Compact enough for airline carry-on
- ✓ Silent operation in shared spaces
- ✓ Works seamlessly with smartphone apps

---

### ● COMPLAINTS

- ⚠ Thermal paper costs more than ink
- ⚠ Limited paper size options for large documents
- ⚠ Battery life degrades with frequent use

## How It Compares

---

- Better than inkjet for travel due to no refills
- Slower than laser printers for high-volume jobs
- More compact than desktop thermal printers
- Less versatile than multifunction printers

## Choose This If...

---

- ✓ You need portable printing for travel
- ✓ You want silent, inkless operation
- ✓ You prioritize compact design over speed
- ✓ You print mostly text documents

## Skip This If...

---

- ✗ You need color printing capabilities
- ✗ You require duplex printing functionality
- ✗ You print large format documents
- ✗ You need high-speed batch printing
