## Who It Is For

---

-  Home users labeling food jars and bottles
-  Small business owners adding QR codes
-  Schools creating name tags and labels
-  Printers needing direct thermal labels
-  Users requiring waterproof storage solutions

## Who It Is Not For

---

-  Users without NIIMBOT B1/B21/B3S printers
-  Those needing non-waterproof labels
-  Customers requiring different label sizes
-  People using inkjet label printers
-  Users needing adhesive-backed labels

## Trade Offs to Consider

---

- Paper material vs synthetic alternatives
- Fixed size may limit versatility
- Sensor chip requires intact packaging
- No ink needed vs. inkjet label costs
- Limited color options vs. multi-color labels

## How It Compares

---

- Better waterproofing than standard labels
- Simpler setup than inkjet systems
- Fewer label sizes than generic sets
- Higher cost than basic paper labels
- Automatic printer recognition vs manual input

## Choose This If...

---

- ✓ You need direct thermal labels for printers
- ✓ Waterproof labels are required for storage
- ✓ QR code/ barcode labeling is needed
- ✓ You want automatic printer compatibility
- ✓ White background with black text is preferred

## ✗ Skip This If...

---

- ✗ Your printer isn't NIIMBOT compatible
- ✗ You need different label dimensions
- ✗ Non-waterproof labels suffice
- ✗ Inkjet label systems are preferred
- ✗ Adhesive-backed labels are required
