Who It Is For

- Businesses printing legal documents
- Offices requiring archival records
- Educational institutions
- Users needing portable printing

Who It Is Not For

- Inkjet printer users
- Those needing non-fade paper
- High-volume industrial printers
- Users requiring color printing

Trade Offs to Consider

- Limited to thermal printer use
- Requires special storage conditions
- Not compatible with traditional printers
- Requires post-print carbon layer removal

⇄ How It Compares

- Versatile use vs specialized paper

- Fade resistance vs standard thermal

- Portability vs bulk printing

- Compatibility vs universal use

✓ Choose This If...

✓ Need fade-resistant archival paper

✓ Use compatible thermal printers

✓ Require portable printing solutions

✓ Prioritize long-term document storage

✕ Skip This If...

✕ Use inkjet printers exclusively

✕ Need color printing capabilities

✕ Require non-fade paper options

✕ Need high-volume industrial printing
